

Syllabus for academic year: 2020/2021														
Description of the course														
Module/Course	Problems of Child Abuse and Neglect						Group of detailed education results							
							Group code D, E, G	Group name Behavioral and social sciences with elements of professionalism. Clinical non-interventional sciences. Legal and organizational aspects of medicine						
Faculty	Medicine													
Major	medicine													
Unit realizing the subject	Department of Forensic Medicine													
Specialties	not applicable													
Level of studies	Uniform magister studies X* 1 st degree studies <input type="checkbox"/> 2 nd degree studies <input type="checkbox"/> 3 rd degree studies <input type="checkbox"/> postgraduate studies <input type="checkbox"/>													
Form of studies	X full-time <input type="checkbox"/> part-time													
Year of studies	III					Semester	<input type="checkbox"/> Winter x Summer							
Type of course	X obligatory <input type="checkbox"/> limited choice <input type="checkbox"/> free choice / elective													
Course	x major <input type="checkbox"/> basic													
Language of instruction	<input type="checkbox"/> Polish X English <input type="checkbox"/> other													
* mark <input type="checkbox"/> with an X														
Number of hours														
Form of education														
	Lectures (L)	Seminars (SE)	Auditorium classes (AC)	Major Classes – not clinical (MC)	Clinical Classes (CC)	Laboratory Classes (LC)	Classes in Simulated Conditions (CSC)	Practical Classes with Patient (PCP)	Specialist Classes – magister studies (SCM)	Foreign language Course (FLC)	Physical Education obligatory (PE)	Vocational Practice (VP)	Self-Study (Student's own work)	E-learning (EL)

Winter Semester													
Direct (contact) education													
Online learning (synchronous)													
Distance learning (asynchronous)													
Summer Semester													
Direct (contact) education													
Online learning (synchronous)	10												
Online learning (asynchronous)													
TOTAL per year:													
Direct (contact) education													
Online learning (synchronous)	10												
Online learning (asynchronous)													
Educational objectives (max. 6 items)													
<p>C1. Making the student familiar with the historical perspective of battered child syndrome (BCS) and neglected child syndrome (NCS), including the relevant definitions and forensic medicine terminology. C2. Making the student familiar with BCS and NCS forms, classifications, estimated incidence and risk factors including their social ramifications.</p> <p>C3. Making the student familiar with specific situations, symptoms and signs that shall raise the suspicion of BCS or NCS including several typical situations, clinical appearance and differential diagnosis.</p> <p>C4. Making the student familiar with the formal rules of documenting cases suspected of BCS and NCS including the need of reporting them to the authorities and stressing the role of medical staff in early identification of BCS and NCS victims and providing them proper support including bioethical aspects.</p> <p>C5. Making the student familiar with short- and long-term results of BCS and NCS - including biomedical, psychological and social aspects; formal and practical aspects of providing medical support to the BCS and NCS victims as well as prophylactics of BCS and NCS.</p> <p>C6. Making the student familiar with different approaches to BCS and NCS in societies including considering BCS and NCS as important social pathology problem both in Poland and internationally and the respective legal regulations on domestic violence.</p>													
Education result matrix for module/course in relation to verification methods of the intended education result and the type of class													
Number of course education result	Number of major education result	Student who completes the module/course knows/is able to	Methods of verification of intended education results (forming and summarising)	Form of didactic class <i>**enter the abbreviation</i>									
W 01	D.W2	Knows the violence forms and the models explaining domestic violence in families and institutions as well as their	Test	L									

		social ramifications and the medical staff's role in their identification.		
W 02	D.W4	Understands the role of verbal and non-verbal skills in communication with patients and the importance of mutual trust between medical staff and the patient.	Test	L
W 03	E.W4	Knows the definitions of battered child syndrome, neglected child syndrome, sexual abuse, mental retardation, behavioral disorders: psychosis, various dependency syndromes, food intake- and defecation-related disorders.	Test	L
W 04	E.W37	Knows the kinds of biological materials used in laboratory diagnostics and rules of preserving the relevant samples.	Test	L
W 05	E.W39	Knows and understands both benefits of laboratory tests and their limitations in case of emergencies.	Test	L
W 06	G.W12	Knows the rules of keeping medical secrecy, keeping medical records, as well as foundations of criminal, civil and professional responsibility of a physician.	Test	L
W 07	G.W19	Knows the rules of sample collecting for the purposes of toxicology and genetic laboratory testing.	Test	L
U 01	D.U9	Is able to identify violence outburst risk factors and to recognize violence cases and to react adequately.	Gives the summary of risk factors, describes the procedure of reaction	L
U 02	D.U10	Applies on the basic level psychological interventions in motivating and supporting the violence victims.	Performs the test examination properly	L
U 03	E.U2	Collects properly the medical history from the child-patient and its family.	Performs the test examination properly	L
U 04	E.U12	Performs differential diagnostics of the most common illnesses in adults and children.	Performs the test examination properly	L
U 05	E.U13	Evaluates somatic and mental status of the patient.	Performs the test examination properly	L
U 06	E.U14	Identifies cases that impose imminent threat to life.	Describes the cases properly	L
U 07	E.U16	Schedules diagnostic, therapeutic and prophylactic activities.	Gives proper activity proposition	L
U 08	G.U5	Recognizes in the child undergoing medical examination behaviors, symptoms and signs suggesting that it can be possibly a BCS or NCS victim.	Performs the test examination properly	L
K 01		Initiates actions aimed for recognition and prevention of child abuse in families	Gives proper action scheme	L

K 02		Reports known cases of child abuse and neglect to proper authorities	Gives proper action scheme	L
<p>** L - lecture; SE - seminar; AC – auditorium classes; MC – major classes (non-clinical); CC – clinical classes; LC – laboratory classes; SCM – specialist classes (magister studies); CSC – classes in simulated conditions; FLC – foreign language course; PCP practical classes with patient; PE – physical education (obligatory); VP – vocational practice; SS – self-study, EL – E-learning .</p>				
<p>Please mark on scale 1-5 how the above effects place your classes in the following categories: communication of knowledge, skills or forming attitudes: Knowledge: 3 Skills: 3 Social competences: 3</p>				
Student's amount of work (balance of ECTS points)				
Student's workload (class participation, activity, preparation, etc.)			Student Workload (h)	
1. Contact hours:				
2. Online learning hours (e-learning):			10	
3. Student's own work (self-study):			3	
Total student's workload			13	
ECTS points for module/course			1,0	
Comments				
<p>Content of classes (please enter topic words of specific classes divided into their didactic form and remember how it is translated to intended educational effects)</p>				
<p>Lectures</p> <ol style="list-style-type: none"> 1. Historical outlook on violence against children and other forms of abuse. Classification of violence forms: Shaken Baby Syndrome (SBS), Battered Child Syndrome (BCS), Neglected Child Syndrome (NCS) and Munchausen Syndrome by Proxy (MSBP). Forms of NCS. Sudden Infant Death Syndrome (SIDS). 2. The unique role of medical staff in detection and documenting of child abuse case. Didactic resources requirements (e.g. laboratory, multimedia projector, other...)
lecture room with multimedia projector

Preliminary conditions (minimum requirements to be met by the student before starting the module/course)
None

Conditions to receive credit for the course (specify the form and conditions of receiving credit for classes included in the module/course, admission terms to final theoretical or practical examination, its form and requirements to be met by the student to pass it and criteria for specific grades)
Each absence must be made up, including rector's days or dean's hours.

Grade:	Criteria (examination evaluation criteria)
Very Good (5.0)	18-20 test points
Good Plus (4.5)	16-17 test points
Good (4.0)	14-15 test points
Satisfactory Plus (3.5)	12-13 test points
Satisfactory (3.0)	10-11 test points
